

## Home Page

Get our Navbar implemented

## Search

- Display icons in location when searching needs to be optimized?

## Filters

- why are icons in certain places (instances)
- Align countries and free text
  - (wants to see <sup>current</sup> functionality)
- Logic of free text
  - choose country is out of view
  - filter might be changed to "Search"

## Priority

News feed is static \*Doesn't care

Uploading content on official accounts  
they are going to be inputting data that  
needs to have their functionality

- update event query \*Delete Events
- Updating user roles is critical
